

XM Radio should be able to broadcast instant traffic and weather. I pay for the services that XM Radio offers and it should NOT be up to the National Association of Broadcasters to dictate what I am permitted to hear. I urge you to REJECT the NAB's petition 04-160 and to support XM Radios ability to provide the kind of programming that I have grown accustomed to...the programming that I demand and deserve.

Respectfully yours,

Michael C. Carlisle
